Chapter 1. Setting Up the USB-Blaster Download Cable

Introduction	1-1
Device Support	1-1
Power Requirements	1-1
Software Requirements	1-2
Hardware Setup	1-2
Software Setup	1-3
Installing the USB-Blaster Driver	1-3
Setting Up the USB-Blaster Hardware in the Quartus II Software	1-4

Chapter 2. USB-Blaster Specifications

Overview	2-1
USB-Blaster Connections	2-1
Voltage Requirements	2-1
Cable-to-Board Connection	2-2
USB-Blaster Plug Connection	2-2
Circuit Board Header Connection	2-4
Operating Conditions	2-4
USB-Revision	2-6
References	2-7

About this User Guide

Revision History

The table below displays the revision history for the chapters in this User Guide.

Date	Version	Changes Made
March 2007	2.2	Update to “Installing the USB-Blaster Driver” section.
July 2006	2.1	Minor update to Chapter 2.
June 2006	2.0	Added USB-Blaster Revision section, updated Figure 2–1, Table 2–1, and Table 2–7. Added Table 2–6.
December 2004		Update to conditions in Table 2–2.
November 2004	1.1	Re-release.
July 2004	1.0	First publication.

How to Contact Altera

For the most up-to-date information about Altera® products, refer to the following table.

Information Type	Contact (1)
Technical support	www.altera.com/mysupport/
Product literature	www.altera.com/literature
Altera literature services	literature@altera.com
FTP site	ftp.altera.com

Note to table:

(1) You can also contact your local Altera sales office or sales representative.

Typographic Conventions

This document uses the typographic conventions shown below.

Visual Cue	Meaning
Bold Type with Initial Capital Letters	Command names, dialog box titles, checkbox options, and dialog box options are shown in bold, initial capital letters. Example: Save As dialog box.
bold type	External timing parameters, directory names, project names, disk drive names, filenames, filename extensions, and software utility names are shown in bold type. Examples: f_{MAX} , qdesigns directory, d: drive, chiptrip.gdf file.
<i>Italic Type with Initial Capital Letters</i>	Document titles are shown in italic type with initial capital letters. Example: <i>AN 75: High-Speed Board Design</i> .
<i>Italic type</i>	Internal timing parameters and variables are shown in italic type. Examples: <i>t_{PIA}</i> , <i>n + 1</i> . Variable names are enclosed in angle brackets (< >) and shown in italic type. Example: <file name>, <project name>.pdf file.
Initial Capital Letters	Keyboard keys and menu names are shown with initial capital letters. Examples: Delete key, the Options menu.
“Subheading Title”	References to sections within a document and titles of on-line help topics are shown in quotation marks. Example: “Typographic Conventions.”
Courier type	Signal and port names are shown in lowercase Courier type. Examples: data1, tdi, input. Active-low signals are denoted by suffix n, e.g., resetn. Anything that must be typed exactly as it appears is shown in Courier type. For example: c:\qdesigns\tutorial\chiptrip.gdf. Also, sections of an actual file, such as a Report File, references to parts of files (e.g., the AHDL keyword SUBDESIGN), as well as logic function names (e.g., TRI) are shown in Courier.
1., 2., 3., and a., b., c., etc.	Numbered steps are used in a list of items when the sequence of the items is important, such as the steps listed in a procedure.
	Bullets are used in a list of items when the sequence of the items is not important.
	The checkmark indicates a procedure that consists of one step only.
	The hand points to information that requires special attention.
	The caution indicates required information that needs special consideration and understanding and should be read prior to starting or continuing with the procedure or process.
	The warning indicates information that should be read prior to starting or continuing the procedure or processes
	The angled arrow indicates you should press the Enter key.
	The feet direct you to more information on a particular topic.

Introduction

The USB-Blaster™ download cable interfaces to a standard USB PC port. This cable drives configuration data from the PC to the device. Because design changes are downloaded directly to the device, prototyping is easy and multiple design iterations can be accomplished in quick succession.

Device Support

The USB-Blaster download cable allows you to program and configure Altera® devices. Specifically, you can do the following:

- Download configuration data to FPGA devices:
 - Stratix® II, Stratix II GX, Stratix GX, and Stratix family of devices
 - Cyclone™ II and Cyclone family of devices
 - APEX™ II and APEX 20K family of devices
 - ACEX® 1K devices
 - Mercury™ devices
 - FLEX™ 10K, FLEX 10KE, and FLEX 10KA family of devices
 - Excalibur™ devices
- Download configuration data to User Flash Memory (UFM) devices:
 - MAX® II family of devices
- Download configuration data to EEPROM-based devices:
 - MAX 3000 and MAX 7000 family of devices
- Perform in-system programming of advanced configuration devices:
 - EPC2, EPC4, EPC8, EPC16, and EPC1441 devices
- Perform in-system programming of serial configuration devices:
 - EPCS1, EPCS4, EPCS16, and EPCS64 devices

In addition, the USB-Blaster download cable supports target systems using 5.0 V TTL, 3.3 V LVTTTL/LVCMOS, and single-ended I/O standards from 1.5 V to 3.3 V.

Power Requirements

The USB-Blaster download cable requires the following power sources:

- 5.0 V from the USB cable
- Between 1.5 V and 5.0 V from the target circuit board

Software Requirements

The USB-Blaster download cable is available only for Windows 2000 and Windows XP systems.

Use the Quartus® II software version 4.0 or later to configure your device. The USB-Blaster download cable also supports the following:

- Quartus II Programmer (for programming and configuration)
- Quartus II SignalTap® II Logic Analyzer (for logic analysis)
- Quartus II Programmer (standalone version)
- Quartus II SignalTap II logic analyzer (standalone version)

Hardware Setup

This section describes how to install and set up the USB-Blaster download cable for device configuration or programming.

For plug and header dimensions, pin names, and operating conditions, see Chapter 2, “USB-Blaster Specifications.”

Connect your USB-Blaster download cable to the circuit board as instructed below.

1. Disconnect the power cable from the circuit board.
2. Connect the USB cable to the USB port on your PC and to the USB-Blaster port.
3. Connect the USB-Blaster download cable to the 10-pin header on the device board. [Figure 1–1](#) shows the USB-Blaster download cable and the circuit board connector.

Figure 1–1. The USB-Blaster Download Cable

4. Reconnect the power cable to reapply power to the circuit board.

The **Found New Hardware** wizard may open and prompt you to install a new hardware driver. Close the wizard and install the hardware driver using the instructions provided in “[Installing the USB-Blaster Driver](#)” below.

Software Setup

This section describes the following:

- Installing the USB-Blaster driver
- Setting up the USB-Blaster hardware in the Quartus II software

Installing the USB-Blaster Driver

This section describes how to install the USB-Blaster driver.

Before you begin the installation, verify the USB-Blaster driver is located in your directory: `\<Quartus II system directory>\drivers\usb-blaster`

If the driver is not in your directory, download the USB-Blaster driver from the Altera web site:
www.altera.com/support/software/drivers

To install the driver, follow the directions below:

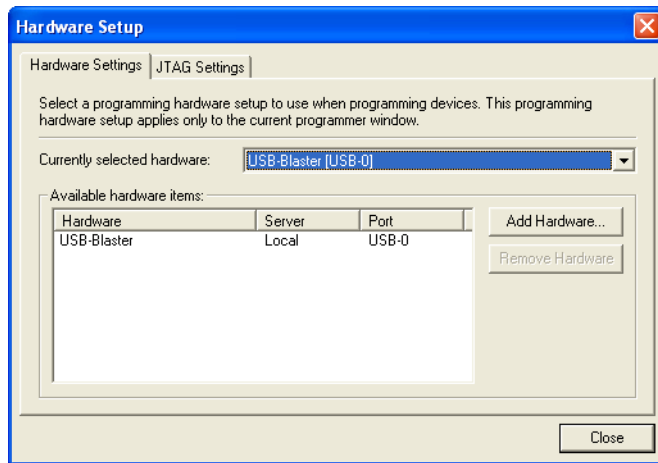

1. Plug in the USB-Blaster download cable to the PC.
2. On the **Found New Hardware Wizard** window, click **No, not this time** and then click **Next** to continue.
3. Select **Install from a list of specific location (Advanced)** and click **Next** to continue.
4. Select **Don't search. I will choose the driver to install**. Click **Next**.
5. Select **Sound, video and game controllers**, and click **Next** to continue.
6. Select **Have Disk** and browse to the location of the driver on your system: \<Quartus II system directory>\drivers\usb-blaster. Click **OK**.
7. Select **Altera USB-Blaster** and click **Next** to continue.
8. Click **Next** to install the driver.
9. Click **Continue Anyway** when the Hardware Installation warning appears.
10. Click **Finish** in the Completing the Add/Remove Hardware Wizard window. Reboot your system.

Setting Up the USB-Blaster Hardware in the Quartus II Software

Use the following steps to set up the USB-Blaster hardware in the Quartus II software:

1. Start the Quartus II software.
2. Choose **Programmer** (Tools menu).
3. Click **Hardware Setup**. The **Hardware Settings** tab of the **Hardware Setup** dialog box is displayed (Figure 1–2).

Figure 1–2. Hardware Setup Dialog Box

4. From the drop-down menu, select **USB-Blaster [USB-0]** (Figure 1–2).
5. Click **Close** to close the **Hardware Setup** dialog box.
6. In the **Mode** list, select the desired mode (Programmer window). Table 1–1 describes each mode.

The USB-Blaster supports the Joint Test Action Group (JTAG), Passive Serial Programming, and Active Serial modes.

Table 1–1. Programming Modes

Mode	Mode Description
Joint Test Action Group (JTAG)	Programs or configures all Altera devices supported by Quartus II software, excluding FLEX 6000.
In-Socket Programming	Not supported by the USB-Blaster.
Passive Serial Programming	Configures all Altera devices supported by Quartus II software excluding MAX 3000 and MAX 7000 devices.
Active Serial Programming	Programs a single EPCS1, EPCS4, EPCS16, and EPCS64 serial configuration device.

For details about programming devices and creating secondary programming files, see the *Programming & Configuration* chapter of the *Introduction to Quartus II Handbook*.

For further information, see the Programming module of the Quartus II online tutorial.

For further information, refer to the following topics in the Quartus II software Help menu:

- Changing the Hardware Setup
- Programmer Introduction
- Overview: Working with Chain Description Files
- Overview: Converting Programming Files

Overview

This chapter provides comprehensive information about the USB-Blaster™ download cable including the following:

- USB-Blaster connections
 - Voltage requirements
 - Cable-to-board connection
 - USB-Blaster plug connection
 - Circuit board header connection
- Operating conditions
- USB-Blaster Revision

USB-Blaster Connections

The USB-Blaster cable has a USB universal plug that connects to the PC USB port, and a 10-pin female plug that connects to the circuit board. Data is downloaded from the USB port on the PC through the USB-Blaster cable to the circuit board via the connections discussed in this section.

Voltage Requirements

The USB-Blaster $V_{CC}(TRGT)$ pin must be connected to a specific voltage for the device being programmed. Connect pull-up resistors to the same power supply as the USB-Blaster $V_{CC}(TRGT)$. See [Table 2-1](#).

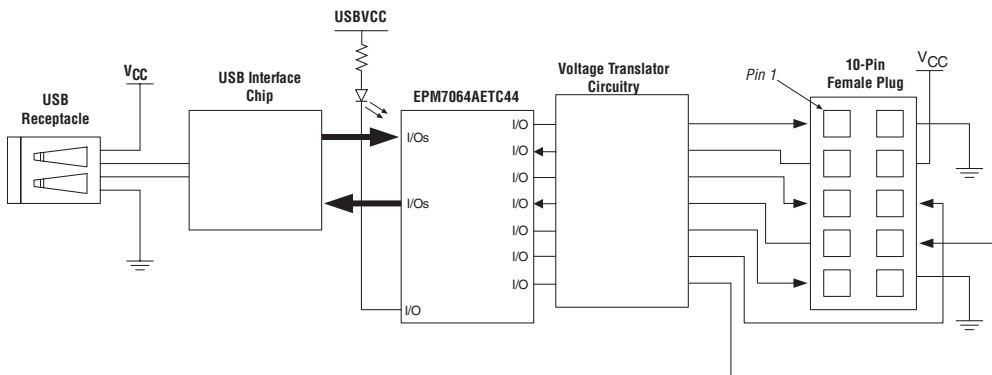

Table 2-1. USB-Blaster $V_{CC}(TRGT)$ Pin Voltage Requirements (Part 1 of 2)	
Device Family	USB-Blaster V_{CC} Voltage Required
MAX II device	As specified by V_{CCIO} of Bank 1
MAX 7000S device	5 V
MAX 7000AE and MAX 3000A devices	3.3 V
MAX 7000B device	2.5 V
Stratix, Stratix II, Stratix GX, and Stratix II GX devices	As specified by V_{CCSEL}
Cyclone II, Cyclone, APEX II, APEX 20K, and Mercury devices	As specified by V_{CCIO}
FLEX 10K, FLEX 8000, and FLEX 6000 devices	5 V
FLEX 10KE device	2.5 V

Table 2–1. USB-Blaster VCC(TRGT) Pin Voltage Requirements (Part 2 of 2)	
FLEX 10KA and FLEX 6000A devices	3.3 V
EPC2 device	5 V or 3.3 V
EPC4, EPC8, and EPC16 devices	3.3 V
EPCS1, EPCS4, EPCS16, and EPCS64 devices	3.3 V

Cable-to-Board Connection

A standard USB cable connects to the USB port on the device. [Figure 2–1](#) shows a block diagram of the USB-Blaster download cable.

Figure 2–1. USB-Blaster Block Diagram

USB-Blaster Plug Connection

The 10-pin female plug connects to a 10-pin male header on the circuit board containing the target device. [Figure 2–2](#) shows the dimensions of the female plug.

Figure 2–2. USB-Blaster 10-Pin Female Plug Dimensions

Dimensions are shown in inches. Spacing between pin centers is 0.1 inches.

Table 2–2 identifies the 10-pin female plug pin names and the corresponding programming mode.

Table 2–2. USB-Blaster Female Plug Signal Names & Programming Modes

Pin	AS Mode		PS Mode		JTAG Mode	
	Signal Name	Description	Signal Name	Description	Signal Name	Description
1	DCLK	Clock signal	DCLK	Clock signal	TCK	Clock signal
2	GND	Signal ground	GND	Signal ground	GND	Signal ground
3	CONF_DONE	Configuration done	CONF_DONE	Configuration done	TDO	Data from device
4	VCC (TRGT)	Target power supply	VCC (TRGT)	Target power supply	VCC (TRGT)	Target power supply
5	nCONFIG	Configuration control	nCONFIG	Configuration control	TMS	JTAG state machine control
6	nCE	Cyclone chip enable	–	No connect	–	No connect
7	DATAOUT	Active serial data out	nSTATUS	Configuration status	–	No connect
8	nCS	Serial configuration device chip select	–	No connect	–	No connect
9	ASDI	Active serial data in	DATA0	Data to device	TDI	Data to device
10	GND	Signal ground	GND	Signal ground	GND	Signal ground

The circuit board must supply $V_{CC(TRGT)}$ and ground to the USB-Blaster cable for the I/O drivers.

Circuit Board Header Connection

The circuit board's 10-pin male header, which connects to the USB-Blaster cable's 10-pin female plug, has two rows of five pins. These pins are connected to the device's programming or configuration pins. Figure 2–3 shows the dimensions of a typical 10-pin male header.

Figure 2–3. 10-Pin Male Header Dimensions

Operating Conditions

Tables 2–3 through 2–5 summarize the maximum ratings, recommended operating conditions, and DC operating conditions for the USB-Blaster cable.

Table 2–3. USB-Blaster Cable Absolute Maximum Ratings

Symbol	Parameter	Conditions	Min	Max	Unit
$V_{CC(TRGT)}$	Target supply voltage	With respect to ground	–0.3	5.5	V
$V_{CC(USB)}$	USB supply voltage	With respect to ground	–0.5	6.0	V
I_I	Input current	TDO or dataout	–10.0	10.0	mA
I_O	Output current for Rev. A and Rev. B cable	TCK, TMS, TDI, nCS, nCE	–20.0	20.0	mA
	Output current for Rev. C cable		–50.0	50.0	mA

Table 2–4. USB-Blaster Cable Recommended Operating Conditions

Symbol	Parameter	Conditions	Min	Max	Unit
$V_{CC(TrGT)}$	Target supply voltage, 5.0-V operation		4.75	5.25	V
	Target supply voltage, 3.3-V operation		3.0	3.6	V
	Target supply voltage, 2.5-V operation		2.375	2.625	V
	Target supply voltage, 1.8-V operation		1.71	1.89	V
	Target supply voltage, 1.5-V operation		1.43	1.57	V

Table 2–5. USB-Blaster Cable (Rev. A & B) DC Operating Conditions

Symbol	Parameter	Conditions	Min	Max	Unit
V_{IH}	High-level input voltage		$V_{CC(TrGT)} - 0.2$		V
V_{IL}	Low-level input voltage			0.15	V
V_{OH}	5.0-V high-level output voltage	$V_{CC(TrGT)} = 4.5\text{ V}, I_{OH} = 1\text{ mA}$	4.4		V
	3.3-V high-level output voltage	$V_{CC(TrGT)} = 3.0\text{ V}, I_{OH} = 1\text{ mA}$	2.9		V
	2.5-V high-level output voltage	$V_{CC(TrGT)} = 2.375\text{ V}, I_{OH} = 1\text{ mA}$	2.275		V
	1.8-V high-level output voltage	$V_{CC(TrGT)} = 1.71\text{ V}, I_{OH} = 1\text{ mA}$	1.61		V
	1.5-V high-level output voltage	$V_{CC(TrGT)} = 1.43\text{ V}, I_{OH} = 1\text{ mA}$	1.33		V
V_{OL}	5.0-V low-level output voltage	$V_{CC(TrGT)} = 5.5\text{ V}, I_{OL} = 1\text{ mA}$		0.125	V
	3.3-V low-level output voltage	$V_{CC(TrGT)} = 3.6\text{ V}, I_{OL} = 1\text{ mA}$		0.125	V
	2.5-V low-level output voltage	$V_{CC(TrGT)} = 2.625\text{ V}, I_{OL} = 1\text{ mA}$		0.125	V
	1.8-V low-level output voltage	$V_{CC(TrGT)} = 1.89\text{ V}, I_{OL} = 1\text{ mA}$		0.125	V
	1.5-V low-level output voltage	$V_{CC(TrGT)} = 1.57\text{ V}, I_{OL} = 1\text{ mA}$		0.125	V
$I_{CC(USB)}$	Operating current (No Load)	(Typical $I_{CC(USB)} = 80\text{ mA}$)		150	mA

Table 2–6. USB-Blaster Cable (Rev. C) DC Operating Conditions					
Symbol	Parameter	Conditions	Min	Max	Unit
V_{IH}	High-level input voltage	$V_{CC(TRGT)} \geq 2.0 \text{ V}$	2.0		V
		$V_{CC(TRGT)} < 2.0 \text{ V}$	$V_{CC(TRGT)}$		V
V_{IL}	Low-level input voltage	$V_{CC(TRGT)} \geq 2.0 \text{ V}$		0.8	V
		$V_{CC(TRGT)} < 2.0 \text{ V}$		0	V
V_{OH}	5.0-V high-level output voltage	$V_{CC(TRGT)} = 4.5 \text{ V}, I_{OH} = -10 \text{ mA}$	3.8		V
	3.3-V high-level output voltage	$V_{CC(TRGT)} = 3.0 \text{ V}, I_{OH} = -8 \text{ mA}$	2.3		V
	2.5-V high-level output voltage	$V_{CC(TRGT)} = 2.375 \text{ V}, I_{OH} = -6 \text{ mA}$	1.8		V
	1.8-V high-level output voltage	$V_{CC(TRGT)} = 1.71 \text{ V}, I_{OH} = -4 \text{ mA}$	1.2		V
	1.5-V high-level output voltage	$V_{CC(TRGT)} = 1.43 \text{ V}, I_{OH} = -2 \text{ mA}$	1.0		V
V_{OL}	5.0-V low-level output voltage	$V_{CC(TRGT)} = 5.5 \text{ V}, I_{OL} = 10 \text{ mA}$		0.8	V
	3.3-V low-level output voltage	$V_{CC(TRGT)} = 3.6 \text{ V}, I_{OL} = 8 \text{ mA}$		0.7	V
	2.5-V low-level output voltage	$V_{CC(TRGT)} = 2.625 \text{ V}, I_{OL} = 6 \text{ mA}$		0.6	V
	1.8-V low-level output voltage	$V_{CC(TRGT)} = 1.89 \text{ V}, I_{OL} = 4 \text{ mA}$		0.5	V
	1.5-V low-level output voltage	$V_{CC(TRGT)} = 1.57 \text{ V}, I_{OL} = 2 \text{ mA}$		0.4	V
$I_{CC(USB)}$	Operating current (No Load)	(Typical $I_{CC(USB)} = 80 \text{ mA}$)		150	mA

USB-Revision

Table 2–7 indicates the revision and description of the USB-Blaster.

Table 2–7. USB-Revision		
Revision	Descriptions	RoHS Compliant
Rev. A (1)	10-pin female connector is connected to the USB-Blaster through a ribbon cable.	No
Rev. B	10-pin female connector is connected to the USB-Blaster through a flexible PCB cable.	No
Rev. C	Hardware upgrade to meet the RoHS lead-free requirement. 10-pin female connector is connected to the USB-Blaster through a flexible PCB cable.	Yes

Note to Table 2–7:

- (1) Revision B and Revision C cable has a "Rev. B" and "Rev. C" marking on the casing. However, you can identify the Revision A cable if the cable is using a ribbon cable and does not have the revision marking.
